

2 – DRAWINGS

There are some drawings that are already done for this project. I am working on the last drawing. In the end there will be 3 of them.

Those drawings are all the same size – 110cm/70cm, made on white paper with red and black pens.

The drawings are made in the same style with the same colors* and the same kind of pen I used to draw when I was a child. Each drawing is structured by personal and collective symbolic images. Each drawing is talking about overcoming a problem, a blockage and understanding of the world.

They will be presented on the 3 walls I will create for this work. The walls will represent the invisible corners of a triangle inside the circle.

*(White color is the source of light. It gives the body, mind and spirit power over the physical realms and allows for total free flow and creativity through all the dimensions. The Red vibration activates the will to clear the way for the higher aspect of self to emerge. Black signifies the energy of the 'void'. The universal forces of black connect each individual human to everything else, through the void of the quantum field, out of which all is created, and through which all communication flows.)
